

Tooling decomposes over
3 dims

① Model

ex GPT 5.5 x high
Claude Opus
Gemini

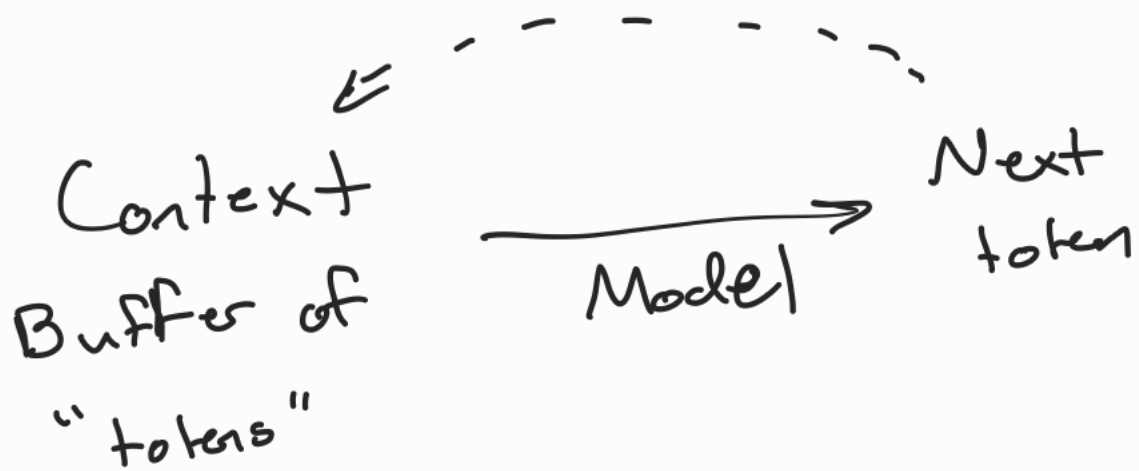

② Harness: How is the model
connected to the world?

ex . Claude Code or Codex
• Chat GPT • Copilot

③ Interface

ex . Web Chat Interface
• IDE $\rightarrow$ VSCode
• TUI

Models

Multimodal

- images
- audio

Key attributes

* • Context Length (e.g. 256k tokens)

- Multimodal Functionality

- Reasoning Depth

- "Intrinsic knowledge"

Context Management
is most important!

Harness How does the model
interact w/ world

Agent = Model + Harness

Actions

- Read / Write a file
- Run code or Python script
- Check email inbox

Next Token

End Generation?

No → Action?
yes → Return

No → Append
+ generate next token
yes → Execute
Action
+ Append Result
+ generate next token

Safety Concerns

! Unrestricted Permissions

"Precondition" the context

Push

Pull

Markdown

\$... \$

③ Interfaces

- Web Chat
- TUI
- IDE → Cursor

"Extrinsic knowledge"

- Files on my system
- Skills
